

## CO-ADMINISTRATION OF DOPAMINE-RECEPTOR BINDING COMPOUNDS

## ABSTRACT OF THE DISCLOSURE

- 5                   Methods for treating a patient having neurological, psychotic, and psychiatric disorders are described comprising the steps of administering to the patient an effective amount of a partial and/or full dopamine D<sub>1</sub> receptor agonist, and administering to the patient an effective amount of a dopamine D<sub>2</sub> receptor antagonist. Pharmaceutical compositions comprising a dopamine D<sub>1</sub> receptor agonist and a
- 10 dopamine D<sub>2</sub> receptor antagonist are also described. The D<sub>1</sub> dopamine receptor agonist and the D<sub>2</sub> dopamine receptor antagonist can be administered to the patient in the same or in a different composition or compositions.
